YOUR HOME YOUR STYLE

The finishing touches can make all the difference when it comes to creating your dream kitchen. Caple sinks are made in ceramic, granite, glass or stainless steel and our taps range from the classic to the hi-tech. They bring your kitchen to life by combining practicality with style, whatever your taste or budget.

Whatever kitchen design you've decided on, Caple has the perfect sink and tap to set it off. Making some key decisions now will help you find just the right combination.

THE CHOICE IS YOURS

THINK ABOUT SINKS

People use sinks in many different ways. Do you require a drainer? How many bowls do you need and what sizes will be most useful? How about the space you have available? Now turn your attention to style. What will go best with your kitchen? Finally, you need to choose the finish – traditional ceramic, contemporary stainless steel, luxurious glass or practical granite?

TIME TO TALK TAPS

With Caple, a tap is not just a tap. You need to choose the type of lever, whether you want purified water or a pull-out spray head? Or perhaps a 3in1 tap with steaming hot water when ever you need it? And, what do you want your tap to look like? The section on tap types and styles on pages 90-95 will help you. From the visually striking to the practical and easy to use, there's a tap for everyone.

CE Caple products are manufactured to the highest standards, all of our sinks are tested to BS EN 13310:2015 and CE certified.

UNDERMOUNTED SINKS

Mounted beneath the worktop, which is cut to fit the size of the bowl. A distinctive, fully integrated look in ceramic, granite and stainless steel. Taps are usually mounted into the worktop behind the sink. Granite, solid surface or wooden worktops are compatible with undermounted sinks.

INSET SINKS

The feature lip around the sink's edge fits on top of the worktop. With finishes available in ceramic, granite, glass and stainless steel. Taps are fitted to the sink itself, however, individual bowls may require the tap to be mounted into the worktop. Granite, solid surface, wooden or laminate worktops can be used with inset sinks.

FARMHOUSE SINKS

They can be installed under the worktop with the front face visible – to accommodate the depth, you'll need a short height cabinet. A period Victorian design – traditionally ceramic. Usually mounted into the worktop, although some sink models allow for them to be fitted to the sink. Granite, solid surface or wooden.

TRADITIONAL TASTES

Often the heart of the home, the traditional kitchen is warm and inviting. With elegant detailing and subtle design elements it has a comforting, old world charm.

AN ABSOLUTE CLASSIC

If your kitchen is traditional or country style, you can't go wrong with a classic ceramic. You can choose from the ever-popular and practical farmhouse style to more subtle and sophisticated designs in many shapes and sizes.

SUITABLY SIZED

They don't come more traditional than the generously proportioned sit-on sinks. Or a smooth and sophisticated inset design might be more to your taste. Whichever you choose, ceramic sinks are hardwearing and easy to maintain with their smooth, gleaming white glaze.

ESPECIALLY FOR YOU

Caple ceramic sinks are manufactured using time-aged methods and materials, making every one unique.

MODERN TWIST

Although ceramic sinks are notably traditional in appearance they are also beautifully adaptable. Why not pair a single bowl Belfast with a contemporary single lever tap to give a fresh take on a classic look.

MODERN AND MINIMAL

The last thing you want from the kitchen you choose today is for it to go out of fashion tomorrow. But smartly designed contemporary styling retains its freshness through clean lines, bold colour and striking aesthetics. Where do you start when choosing a contemporary sink and tap?

NATURALLY GOOD LOOKING

The practical granite sink has become a style icon. Quite right too, as it offers you immense durability, and comes in an array of glamorous colours.

SLEEK STAINLESS STEEL

Quickly being fashioned into ever more inspired and imaginative designs. Its sleek lines and neutral finish complement many colour schemes and appliances.

PROFESSIONAL PULL-OUTS

Go for an industrial look with a pull-out or choose a slim line curved tap for that fresh, contemporary feel. Modern styling is all about contrasts so you can mix and match to your heart's content.

PICK AND MIX

In the spirit of modernity, why not combine different shapes and sizes? Mix bowls together to reflect your individuality and add the ultimate designer tap for a real talking point.

Ceramic Sinks

At home in any kitchen, a ceramic sink offers you the simple elegance of a bygone era, yet can look the part in the most contemporary settings.

FARMHOUSE SINKS

These time-honoured classics will stand the test of time in today's busy kitchen. Their generous proportions are perfect if you want to make a sizeable design statement.

SITTING PRETTY

The Lingfield [above] gives you the option to have a farmhouse style sink which works perfectly with laminate and solid wood worktops. This clever design gives a traditional Butler appearance from the front and protects the cut edges of the work surface from water by using a lip on the sides and rear. It is also simple to install as no bespoke cabinetry is required.

A selection of our handmade ceramic sinks are specially glazed to reduce surface bacteria by 99.99% preventing germs from spreading. Unlike a thin coating, the anti-bacterial glaze will last the lifetime of the sink and is safe to use in every environment.

ACCESSORIZE

Ceramic by nature is hard-wearing but to avoid any accidents protect the base of the bowl with a perfectly fitting sink grid.

Note: Each sink is hand finished, so no two sinks are ever alike – sizes may vary by plus-or-minus 2%. We recommend measuring the actual sink before fitting.

UNDERMOUNTED AND INSET SINKS

Choose from inset or undermounted ceramic sinks to make a distinctive style statement. A classic yet contemporary look that exudes elegance and fits easily into many different styles of kitchen.

DESIGNER DRAINING

The design of the drainer pattern can have a dramatic impact on the overall look of the sink. For a flat, modern style, go for our Avalon sinks. If you want something softer, how about the Foxboro range?

KEEP ON TOP OF IT

With their gently raised lip and smooth lines, inset sinks blend subtly and discreetly onto your worktop surface. Available in many shapes and sizes, this versatile style drops seamlessly into any kitchen.

UNDERSTATED STYLE

Fully integrated beneath the worktop, undermounted sinks give a very distinctive look to your kitchen. Used with granite, solid surface or wood worktops.

A selection of our handmade ceramic sinks are specially glazed to reduce surface bacteria by 99.99% preventing germs from spreading. Unlike a thin coating, the anti-bacterial glaze will last the lifetime of the sink and is safe to use in every environment.

Note: Each sink is hand finished, so no two sinks are ever alike – sizes may vary by plus-or-minus 2%.
We recommend measuring the actual sink before fitting.

INDIVIDUAL BOWLS

Round, square, rectangular, there's a shape and size to complement your kitchen perfectly. Or pair two bowls of your choice for a unique style.

Our elegantly proportioned individual ceramic bowls are more than just practical and hardwearing. They give you complete design flexibility, so you can choose the size, shape and number of bowls to suit

your lifestyle. For a clean and classic look, try our traditional round bowl. For something chic and contemporary, how about a single ceramic bowl pair with a stainless steel tap?

Granite Sinks

These are practical and beautiful sinks to cope with the demands of everyday living. Granite is synonymous with durability and can also offer you an array of stylish colours to match your décor.

MATERIAL INNOVATION

PICK A COLOUR

Our range consisting of four families are made from Geotech, which is available in four sophisticated colourways – metallic Anthracite, matt Desert sand, matt Chalk white and matt Pebble grey.

AN – Anthracite [metallic] DS – Desert sand [matt] CW – Chalk white [matt] PG – Pebble grey [matt]

Our stunning Anthracite colour is infused with a sparkling metallic fleck, guaranteed to add a touch of glamour to your kitchen. Desert sand has a warm, natural feel if you're looking for understated elegance and Chalk white's rich white tones provide the ultimate in relaxed sophistication. If you prefer a slightly industrial, yet ultra modern tone, Pebble grey is perfect to create this look.

NATURALLY GOOD LOOKING

These sinks offer the beauty of natural stone, yet can be moulded into an unlimited number of inspiring designs.

Features

KIND ON THE ENVIRONMENT

Geotech is made up of around 80% natural materials and manufactured using low energy consumption.

KEEPS ITS COLOUR

Completely colourfast, the metallic and matt colour finishes will both stay fresh and vibrant.

EASY TO CLEAN

All you need to keep Geotech sparkling is warm water and washing-up liquid.

HEAT & BURN RESISTANT

Hot pans? No problem – resistant to heat, cracking, discolouring, blistering and warping.

HIGHLY DURABLE

Produced to be extremely hard-wearing, it takes the knocks and scrapes of daily life in its stride.

STAIN RESISTANT

Geotech is resistant to permanent staining. As long as it's cleaned regularly, it won't discolour or stain.

CUT-RESISTANT

Both cut and scratch resistant, Geotech will retain its unblemished surface through thick and thin.

SOTERA INSET SINKS

Modern, minimal design made in our advanced Geotech material make Sotera a very attractive and practical combination.

With strong, straight lines the Sotera brings a bold presence to any kitchen. A simple, yet refined drainer pattern and the subtle introduction of stainless steel detail within the

bowls and drainer, enhance Sotera's undoubted feeling of quality. Available in all four Geotech colours, Anthracite, Desert sand, Chalk white and Pebble grey, the choice is yours.

CANIS INSET SINKS

Why choose just a sink when you can have a kitchen work centre? Canis is a beautifully practical idea, combining advanced material technology with precision design and aesthetics.

Elegant and architectural, Canis will look magnificent in your modern kitchen. And because it's manufactured using Geotech, Canis will retain

its exceptional looks however rough you treat it. It won't warp, cut or fade, so you can carry out your daily tasks without worrying.

GRANITE

VEIS INSET SINKS

Looking for a durable, stylish sink with modern clean lines and subtle design hints? If so, you've found it with Veis.

A drainer pattern with simple, clean lines and bowls with subtle curves give Veis an understated but thoroughly modern feel.

Made from our hard-wearing composite material Geotech, these sinks combine style with practicality.

LEESTI INSET OR UNDERMOUNTED SINKS

These bowls can be inset for a statement feature or discreetly undermounted offering a truly contemporary look. Practical, versatile and stylish they look great with any worktop.

With their gracefully subtle corners and the satisfying proportions Leesti exudes elegance. Choose from a single or a bowl and a half sink,

inset or undermounted, to give you exactly what you want. For a sophisticated style, why not try two single bowls side by side?

Glass Sinks

For a distinctively modern alternative to the traditional sink, our glass sinks are hard to surpass. Durable stainless steel bowls with fresh designs, these sinks will stand out in any kitchen.

PRACTICALLY PERFECT

Completely colourfast, the black and white finishes will keep its vibrancy and with a regular clean it won't stain or discolour. Glass is renowned for being hygienic and easy to clean, simply wash with warm

water and washing up liquid. The tempered, impact resistant glass means this makes for a strong and highly practical sink surface. Hot pans? No problem – the surface is resistant to heat

The glass drainer functions similarly to undermount sinks set directly into the work surface therefore small amounts of water may remain. This can simply be wiped away.

The glass drainer functions similarly to undermount sinks set directly into the work surface therefore small amounts of water may remain. This can simply be wiped away.

Stainless Steel Sinks

Stainless steel has been the automatic choice for professional cooks over many years. Why not make it yours? It is tough, resilient and highly practical – and in our range of styles and shapes it looks sensational too.

INSET SINKS

PERFECT FIT

Inset sinks are the only sink that can be neatly fitted into any surface type.

FAMILY BUSINESS

Sinks are grouped into families, making it easy to find the style and bowl combination to suit. Each set feature drainers, with a distinctive pattern for a unique look.

TO THE LEFT?

Do you need a drainer on the left or right side? With many of these sinks you have the flexibility to choose. For a conventional look, go with a single bowl with drainer. Or for something a little different, try a one and a half bowl.

LOW PROFILE

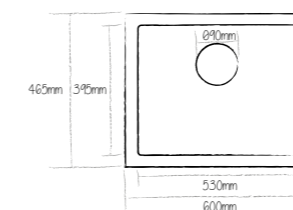

Low profile for a cleaner, sleeker fitting, our Blaze and Cubit sinks feature a low profile edge of only 1mm.

CUBIT INSET SINKS

Cubit sinks add minimalist design to the benefits of stainless steel sinks, to create a sink for those that love clean lines and no nonsense modern styling.

Sharp, crisp edges and an uncluttered design, coupled with a sleek, low profile edge of only 1mm, give the Cubit sinks an industrial quality that many modern designers like to use in today's cutting edge kitchens.

AXLE INSET AND UNDERMOUNTED SINKS

Introducing Caple's new range of inset and undermounted stainless steel sinks. With a choice of 3 sizes, each sink includes a steel colander and a wooden chopping board, both of which are specially designed to fit the bowl perfectly. Each accessory sits side-by-side on a small ledge making it quick and easy to chop, drain and rinse freely.

Axle sinks are ideal for apartment living, freeing up valuable worktop areas when space-saving is key.

ZERO INDIVIDUAL AND MULTIPLE BOWLS

For the razor-sharp, minimalist look adopted by designer kitchen aficionados, nothing is better than Zero. These bowls feature crisp edges and clean lines in an uncluttered design.

LOOKING SHARP

The clean lines and minimalist styling of our Zero sinks suit modern kitchens to a tee.

Featuring a unique angular bowl with a 'zero' degree radius and tapered base, they'll take your designer kitchen to a new level.

PERFECT FIT

The striking geometric bowls come in many sizes, for countless creative possibilities. With multiple bowls and a sleek shallow drainer also available you can let your imagination run riot. Made from stainless steel, they won't rust,

stain, fade or crack, remaining pristine whatever you put them through.

Zero sinks can be inset or undermounted allowing you to combine them beautifully with any worktop.

MODE INDIVIDUAL AND MULTIPLE BOWLS

Chic, modern and sophisticated sums up our Mode collection. These smart stainless steel bowls provide a wide variety of options that will finish off your modern kitchen – beautifully.

With so many options to choose from, including single and double bowls and a matching drainer, you'll find just the right combination for your kitchen. To achieve a contemporary aesthetic pair two bowls of your choice.

MODERN MODE

Mode's distinctive look combines ultra modern straight edges and subtly curved corners. The result? A contemporary sink with a touch of class.

TRULY VERSATILE

Whether you prefer an inset or undermounted look, Mode sinks are flexible enough to accommodate any worktop and tap of your choice.

ACCESSORY OPTIONS

The charming, individual bowls come in a selection of shapes and sizes. Or if you want a more personalised combination of sinks you can choose from our multiple bowl options.

You have the choice of an undermounted sink for use with wooden, granite or solid surface worktops, or one of our inset models that can be used with laminate surfaces.

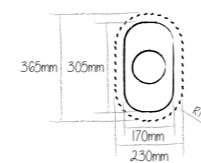

Crafted from stainless steel, Form sinks will keep their shiny good looks whatever you throw at them. Practical, stylish and functional, this collection meets the most demanding kitchen criteria.

OPTIONS TO SUIT YOU

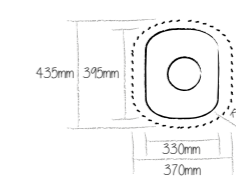

Do you like the clean look of individual bowls but also need a drainer? Our round inset drainer option could be the answer. For a modern twist on the traditional country cottage style, pair this drainer with a single round bowl dropped into a solid wood worktop.

TAPS

Today's taps are more than just functional objects, they are mini works of art. With so many design styles and types of technology to choose from the right tap can set the tone for your entire kitchen.

WHAT'S YOUR TYPE?

VAPOS 3IN1 STEAMING WATER TAP

Whether you want to make a hot beverage, blanch vegetables or reduce boiling time for pasta, Vapos 3in1 taps have an instant supply of 98°C steaming water. As well as a supply of fresh cold water and regular hot water. And, the incredibly advanced filtration system means it provides the best water quality possible.

SINGLE CONTROL

Simplicity itself, with everything controlled by a single lever – move it left and right for temperature, or up and down for pressure.

PULL-OUT SPRAY

The only tap for professionals, our stylish range is brilliantly designed, with some models providing a minimum pressure rate of 0.3 bar.

DUAL CONTROL

Added control and ease of use, with a dedicated lever controlling both hot and cold water.

CAPLE PURITI

With a Caple Puriti filter tap you can have ordinary hot and cold water, as well as purified water from one single fitting – as an extra lever diverts water through the filter. The activated carbon filter removes chlorine, rust and sediment so you can feel better about the water you consume. You might also find it improves the taste! Each filter lasts approximately six months and can easily be changed without tools.

To order your replacement filters go to www.caple.co.uk for next day delivery.

caple
PURITI

THE INSIDE STORY

Taps aren't as simple as they look. How they work can be quite technical. Before you make your choice here are some things to consider.

WRAS APPROVED

The Water Regulations Advisory Scheme (WRAS) is the UK Water Industry's approval scheme.

Our range of WRAS approved taps have been fully tested and are fully compliant with the requirements of the water regulations and byelaws. WRAS Approval is considered the best way to demonstrate compliance as it is granted directly by representatives of the water suppliers and is therefore accepted by every water supplier in the UK.

VALVE TYPES

You can choose from many different valve options to control how your tap works. In a single lever model, the lever is moved in two directions to control the tap. Other types of tap use either basic compression valves or the superior quarter turn valves that respond quicker.

WATER PRESSURE

Some taps need more pressure than others to flow at the same rate. A pressurised water heater system will provide enough water pressure for any of our taps. However, an unpressurised system may not. You will need to calculate the pressure before choosing a tap that has a minimum requirement – otherwise it might not work properly. To do this, measure how far the water tank is above the tap in metres and divide by 10. This gives the water pressure in bars. Remember that any bends or junctions in the pipework will reduce the pressure.

If you are not sure how to calculate your hot water pressure, ask your plumber. Water pressure can be increased by adding a separate water pump.

WATER EFFICIENT CSH COMPLIANT TAPS

We have developed a collection of taps specifically designed to conform with the water flow required for the Code for Sustainable Homes [CSH] Level 3. These taps have a flow rate of 4 litres per minute or less when measured at 3 bar of pressure. Look out for the water efficiency logo.

SINGLE FLOW

In a single flow tap, there is one channel for hot and cold water to get the correct temperature required.

DUAL FLOW

Added control and ease of use, with a dedicated lever controlling both hot and cold water.

STAINLESS STEEL

At Caple we don't believe in compromise. Our taps are made from the highest grade stainless steel, giving our stainless steel taps great resistance to corrosion.

Stainless steel is much more than a different look and finish. Unlike chrome taps, stainless steel taps do not have a coating, they are solid steel. Also known as Inox steel, it is an alloy with a 10%+ chromium content and this is what makes it so resistant. The chromium content forms a passive film of chromium oxide on the metal surface protecting the tap.

But our taps are not only tough and well engineered but beautifully styled. Styles from the more classic to the absolute contemporary and with 19 in the range to choose from you are spoilt for choice. Of course, the stainless steel tap range particularly complements our range of stainless steel sinks. Bring them together and they add a great finishing touch to any kitchen.

Stainless
STEEL

VAPOS 3IN1 STEAMING WATER TAP

Vapos taps supply fresh cold water, regular hot water and filtered 98°C steaming water, the perfect temperature for preparing tea, blanching vegetables and assisting the cooking of pasta or rice.

Water conditioning technology provides exceptional accuracy for scale and acidity control for increased boiler protection, this means outstanding food and beverage quality.

Quick and simple installation allows the tap, filter and boiler to be easily retrofitted. Finished in stunning stainless steel, Vapos taps exude style and practicality.

OUTSTANDING WATER FILTRATION

Offering a new standard of water filtration technology, providing extraordinary accuracy for scale and PH control. This water filtration and conditioning technology effectively combines hardness reduction, mineral stabilization and corrosion inhibition by maintaining a controlled low carbonic acid level in the water.

It delivers the best available water quality for hot drinks by removing lime scale build up in the boiler [provided filters are installed and maintained/exchanged in line with manufacturer recommendations].

It includes DuoBlend® valve technology for the most accurate bypass ratio and a 5µm Carbon block membrane for particle protection, reducing tastes and odours such as chlorine and chlorine by-products, THM's, PAH's and pesticides such as Simazine, Atrazine, Lindane and Dieldrin. Each filter lasts approximately six months and is easily changed without tools.

Order your replacement filter cartridge [PURIT13] or full fitting kit including the cartridge [PURIT14] at WWW.CAPLE.CO.UK for next day delivery.

Filter and fixing kit available to buy online at www.caple.co.uk

Boiler dimensions: width 200mm, height 290mm, depth 225mm

LARGE BOILER

A large boiler capacity means 2.4 litres of steaming water is ready for use whenever you need it. With a temperature range of 50°C–98°C it uses less electricity than a 40W light bulb.

All caple accessories are available to buy online at www.caple.co.uk

DIMENSIONS

Worktop cut out 35mm required

SO, HERE'S THE TECHNICAL BIT...

The cold water from your water supply passes through the filter into the 2.4L boiler. The water temperature can be easily adjusted from 50°C – 98°C to suit your requirements by simply turning the dial located at the front of the boiler.

For steaming water use the smaller lever on the left hand side of the tap. Push down the lever to release the child safety mechanism then turn and hold to start a steady flow of steaming water, when you are finished the unique spring loaded lever automatically shuts off the steaming water.

It couldn't be easier to change the filter. There is no need to cut off the water supply, just twist the used filter to release it – this automatically isolates the water supply making it easy to twist the new cartridge into place.

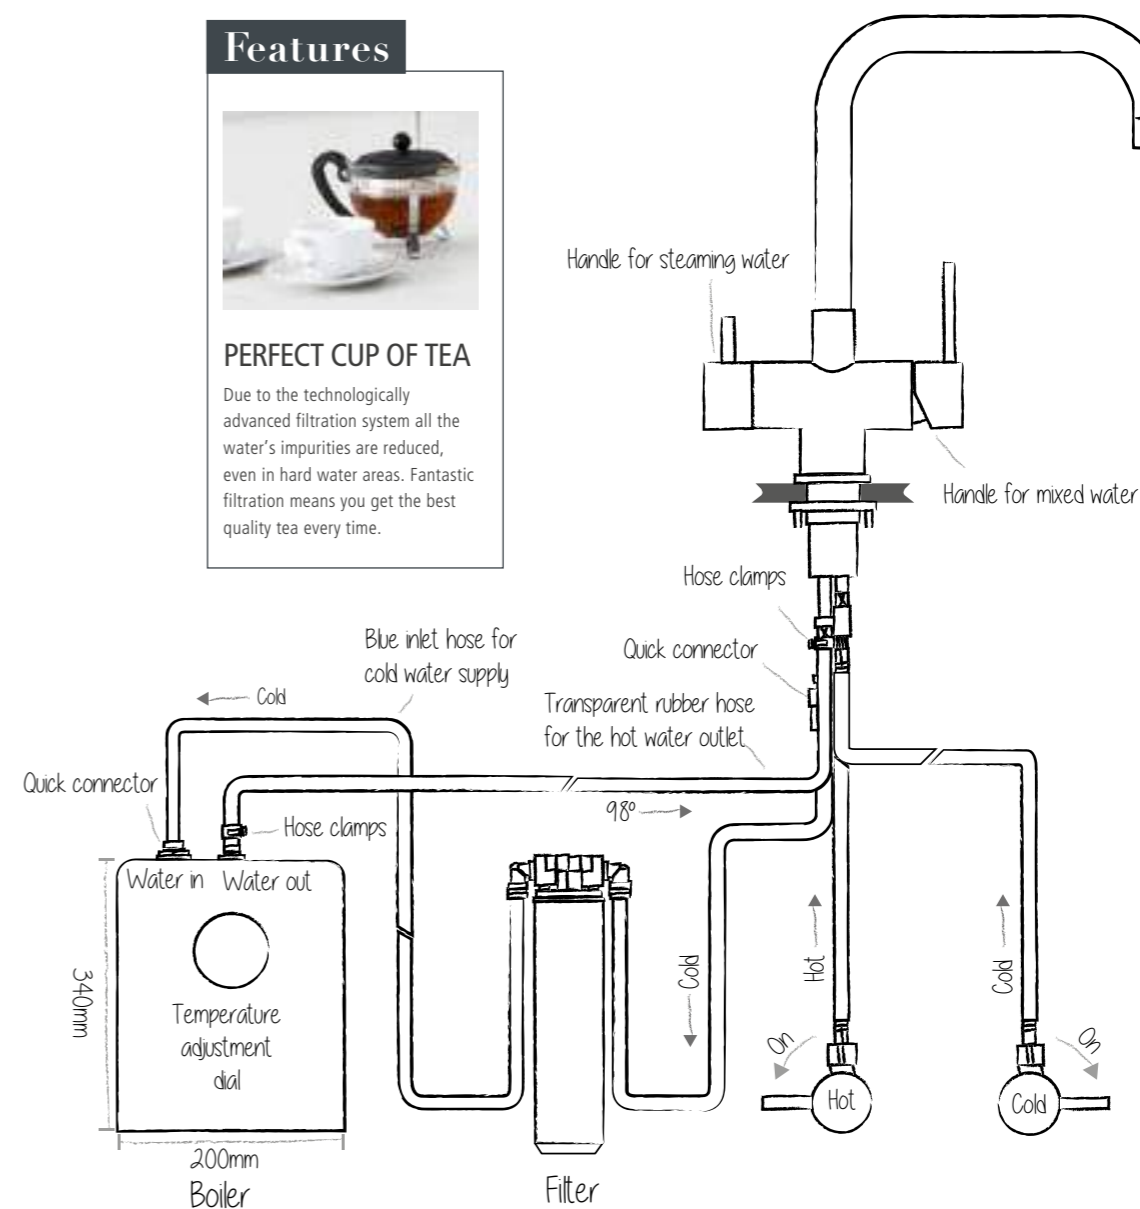

All Caple accessories are available to buy at www.caple.co.uk for next day delivery.

Features

PERFECT CUP OF TEA

Due to the technologically advanced filtration system all the water's impurities are reduced, even in hard water areas. Fantastic filtration means you get the best quality tea every time.

Replacement filters and fixing kits are available to buy online at www.caple.co.uk

PURITI

Fancy purified, filtered cold water on tap?

Choose a Caple Puriti tap to deliver regular hot and cold water with the added benefit of fresh filtered water. It is either dispensed using a third lever or sometimes fully integrated into the standard design.

An ingenious filtration system is hidden from sight in the kitchen unit, and by turning the filtration tap, your normal cold water supply is diverted via the Caple filter to the tap and in to your glass. It is also great for areas with particularly hard water. By using the filtered water in kettles and cooking you greatly reduce the damaging impact of lime-scale build up in appliances and reduce the effect of water impurities during food preparation, whilst also improving tea and coffee.

caple
PURITI

As the filter tap is turned the normal cold water supply is redirected through a series of filtration processes including activated carbon. This removes almost all chlorine improving the taste, and other impurities such as particulates, bacteria, rust, heavy metals and pesticides, while also acting as a scale inhibitor. It also helps maintain the pH balance of the water, which is much healthier than consuming overly acidic or alkaline normal tap water.

Caple Puriti filter can last up to 4 x longer compared to other filtration systems on the market. Puriti filters up to 6000 litres compared to only 300 – 1500 litres.

The Caple Puriti filter is discreetly installed under the sink. It will be easily accessible for changing which will need to be done about every six months. This is a very straight-forward process that does not require any tools.

Features

HOW TO REPLACE YOUR FILTER

Replacing your filter is simple and straightforward. Watch our step by step video on our YouTube channel, CapleTV.

PULL-OUT AND SPRAY

More and more of us no longer see our kitchens as a place where we merely make something to eat but a place to experiment with new tastes and new techniques. A place to enjoy the preparation and creation of food for family and friends.

We are spending more and more time in our kitchens. Never has it been more true that they are the heart of the home.

Therefore, the demands and expectations from our kitchens, the appliances and the fittings also become more demanding. This is where Caple's range of spray taps step up to the plate.

With technology taken from professional kitchens they work on the same principle as a single lever tap design with the standard hot and cold functions.

However on some models the nozzle pulls out on an extended, flexible metal hose. By pressing the button on the side of the spray head the nozzle produces a high pressured spray or jet of water.

This is perfect for washing vegetables or fast rinsing of plates and crockery. No busy kitchen or accomplished cook should be without one.

PULL-OUT SPRAY TAPS

The powerful spray makes it so much easier to wash and rinse items. Used in most professional kitchens worldwide, it's a must-have for accomplished chefs.

The secret is in the nozzle. As well as a powerful spray, some models have a long flexible hose that can be pulled out allowing you to move the tap freely around the sink.

ATLANTA PULL-OUT

Features

360° PIVOT

Seamless body with 360° pivot at the base

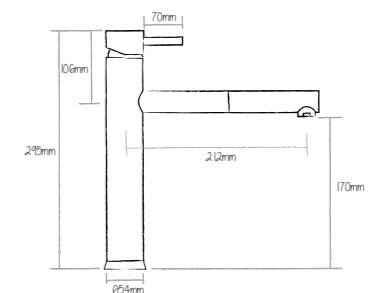

PRODUCT CODE
ATLP/SS

SINGLE CONTROL

ENDLESS CHOICE

With Caple's single control taps you can be sure that the engineering that goes in to one of our taps is second to none. Smooth gliding operation, robust seals and a solid finish. So now all you have to do is decide which style and finish is best for you. With various finishes in so many designs from the classic to the contemporary, it may be harder task than you think.

SINGLE LEVER SIMPLICITY

Everything controlled by a single lever – move it left and right for temperature, or up and down for pressure.

EASY AND ADAPTABLE

Single control or single lever taps have stood the test of time. It is testimony to their ease of use and adaptability to great design.

DUAL CONTROL

CLASSIC, COOL AND CONTEMPORARY

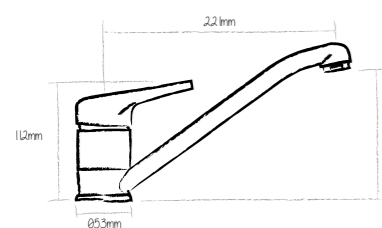

Classic does not mean old fashioned. For many of us dual control taps are a matter of personal preference. Hot on the left, cold on the right. It's as simple as that.

But even with the classic dual control, designs vary. There is the monobloc design or bridge design.

Choose ceramic handles to match your ceramic sink. Sleek solid stainless steel – a premium material and very contemporary. Chrome - bright and reflective. Brushed nickel – subtle and blemish free. Pewter. Distinctive with a traditional twist. All meticulously designed and beautifully engineered.

Whichever you choose you can be sure that they all have one thing in common Caple's uncompromising quality.

WASTE DISPOSAL UNITS

A waste disposer hidden away under the sink can help you recycle your food scraps and leftovers like potato peelings, chicken bones, egg shells and tea bags. It's clean, it's green and it leaves you less to clutter up your bin.

Simply turn on the cold tap and the disposer, then empty everything into the sink. The disposer grinds the food waste into fine particles and flushes the waste away down the drain.

Since more than 25% of household refuse is food, that means much less rubbish for the dustmen to take away to clog up our landfill sites, and a reduction in the amount of greenhouse gases emitted.

Disposer waste can be recycled into a soil conditioner once it reaches the water treatment plant so you will be making a positive contribution to your environment.
